

Directions for the Syllabus Generator Tool

Step 1. Open the application on Aeron's GitHub

<https://aeron100.github.io/SyllabiSolution/>

Step 2. Upload your course .imsc file

Note: How to export from Canvas

1. In your Canvas course, open Settings and choose Export Course Content.
2. Pick Course as the export type and start the export.
3. When it finishes, download the .imsc file and drop it here.

A screenshot of the 'Syllabus Generator' web application. The interface has a dark blue header with the title 'Syllabus Generator' and a sub-header 'Product of Coastline College Institutional Effectiveness Department'. On the right, there is a form with fields for 'Course title' and 'Instructor name'. In the center, a white box with a dashed border contains an icon of a document with a checkmark, the text 'Drop your course export here', the word 'or', a blue button labeled 'Choose a file', and the text 'Accepts .imsc or .zip'. At the bottom, there are three links: '> How to export from Canvas', '> What to expect', and '> About accessibility'.

Step 3. Select the course elements that you need in your course. Then select the *Next* button.

MORE LOOKS

Ink & Paper
Black and white.
Cheapest to print.

Ember & Ash
Warm, energetic

Jade & Gold
Calm, natural

Sapphire & Brass
Classic academic

Plum & Blush
Rich, literary

Slate & Coral
Cool, technical

Garnet & Cream
Traditional

Ochre & Olive
Earthy, archival

Harbor & Sand
Coastal, quiet

Terracotta & Moss
Mediterranean

College colors come from each college's published brand guide. More looks use the Tailwind CSS color scales. Every look is checked for contrast.

Layout

☒ **Cover page**
Course title, term, and the details from the cover form.

☒ **Coastline College logo**
On the cover, above the course title.

☒ **Table of contents**
A list of the sections, after the cover.

☐ **On-page navigation**
Keep each page's own contents lists, jump links, and Back to top links.

☒ **Page break between sections**
Each section starts on a new page when printed.
